Alessio Beltrame, Ugo Bordoni Foundation
Andrea Mondo, INWIT (REMOTE)
Giuseppe Neri, SWARCO
Claus Pahl, Free University of Bolzano*

13:00 Light lunch e Demo "on the road"

A conference will be held at the Plessi Museum facilities at the Brenner Pass border, with institutional interventions illustrating the 5G-CARMEN project, its technological context, the results obtained and the infrastructure deployed.

During the light lunch that will follow, there will be the possibility for attendants to participate in the demos on the road, thanks to vehicles equipped with the technologies resulting from the 5G-CARMEN project. While crossing the border from Austria to Italy, these vehicles will perform the semi-autonomous maneuvers enabled by 5G.
